SAFETY AND TRUST

2025

We are the leading experts in training, inspection and certification in the fields of Quality, Anti-Bribery, Information Security, Protection and Privacy of Personal Data, Business Continuity, E-Commerce, Workplace Psychosocial Risk Factors, Environmental and other similar matters of standards and compliance.

We can help your organization meet its potential and achieve its goals through implementation of standardization and ongoing improvement practices geared toward excellence.

Our primary objective is to understand your needs and business goals in order to design customized, efficient services that comply with current national and international regulatory frameworks.

Our highly qualified staff of experts possesses the knowledge, skills and experience that guarantees excellent performance in the services we provide.

In 2020, **NYCE** joined **QIMA** in order to consolidate its position in the industry and continue to grow locally and internationally, while always delivering the highest quality services.

ACCREDITATIONS AND RECOGNITIONS

- In Mexico, we are certified by the **Mexican Accreditation Entity (ema)** as a **Certification Body for Management Systems, Processes, Products, Services, Persons and Professionals**, and to operate as an **Inspection Unit**; and in **Colombia** we are certified by the **National Accreditation Body of Colombia (ONAC)**, as a certification body for **Management Systems, Processes, Products and Services**.
- Our certificates are accepted by other foreign certification bodies, since the EMA and the ONAC are signatories to the **Multilateral Recognition Arrangement (MLA)** of the **International Accreditation Forum (IAF)**.
- We are members of **IQNET**, which comprises the most extensive, significant international network of the leading certification bodies worldwide.

Choose our Certification and Inspection services!

Management Systems Certification:

- **ISO 9001 – Quality. - Increases customer satisfaction.** This certification guarantees the ability to offer products and services that meet the demands and requirements of customers.
- **ISO 14001 – Environment.** This certification helps to identify, prevent and control the environmental impacts generated by organizations producing or delivering products and services.
- **ISO 45001 – Occupational Health and Safety.** This certification provides a general framework for structuring safe and healthy workplaces, and preventing accidents, injuries and other adverse health effects to employees.
- **ISO/IEC 20000-1 – IT Services.** This certification provides parameters for evaluating the operation and quality of services supported by Information Technologies.
- **ISO 22301 – Business Continuity.** This certification helps determine potential threats to an organization, from conditions that might impact the operation of the business to the consolidation of an agile labor framework capable of responding effectively to any eventuality.
- **ISO/IEC 27001 – Information Security.** This certification serves to determine processes, controls and mechanisms to protect information by safeguarding confidentiality, integrity and availability, providing assurance and reliability to interested parties.
- **ISO/IEC 27701 – Personal Data and Information Privacy.** An extension of ISO/IEC 27001, this certification provides a framework for Controllers and Processors of Personal Identification Information (PII) in the management of privacy controls to reduce the risk of adversely affecting privacy rights of individuals.
- **ISO/IEC 42001 - Artificial Intelligence Management System.** Specifies the requirements and provides guidance for establishing, implementing, maintaining and continually improving an AI management system (AIMS) within the context of an organization.
- **ISO 37001 – Anti-Bribery.** This certification scheme promotes ethical organizational cultures and implementation of appropriate controls for the detection, response and eradication of corrupt practices in private and public organizations.
- **ISO 21001 – Educational Organizations.** Common management tool for organizations that provide educational products and services targeted at meeting the requirements of students and other beneficiaries.

Process and Product Certification:

- **Protection of Personal Data.** This certification serves to evaluate and certify compliance of organizations and executive management with current Mexican legal framework.
- **ISO 18295 – Customer Contact Centers.** This certification provides guidelines and specific requirements for both owner-operated and sub-contracted Customer Contact Centers (CCC).
- **ISO/IEC 29110 - Software Development and Maintenance.** This certification seeks to improve the quality of the software product and/or service, and improve the performance of software developments organizations.
- **NMX-I-9126-2-NYCE-2011 (ISO/IEC 25001*) - Software Product Certification.** This certification provides guidelines for the execution of functionality tests and tests of other features in order to demonstrate that software meets quality standards and performance targets (*In the near term, the ISO/IEC 25001 standard will apply).
- **NMX-R-025-SCFI-2015** – Voluntary instrument that serves to acknowledge workplaces that practice equality and non-discrimination, favoring the comprehensive development of workers.

Certification of Persons and Professionals

- **Certification of Persons and Professionals (Auditors and Implementers).** Through a rigorous, often accredited evaluation process, this certification serves to demonstrate the knowledge, skills and competencies of Auditors and Implementers in any given field.

Inspection

- **NOM-035-STPS – Psychosocial Risk Factors at Work.** This certification establishes the factors required to identify, analyze and prevent psychosocial risk factors, as well as to promote an auspicious organizational and workplace environment (Scheme accredited and in the approval process).
- **NMX-I-059/02-NYCE-2011 (MoProSoft) - Process Model for the Software Industry.** This certification helps software development and maintenance organizations improve the way they design and manage their projects.
- **NMX-COE-001-SCFI-2018 - E-commerce.** The first Mexican Standard that establishes the mandatory provisions to be met by physical persons and corporations that offer, market or sell goods, products or services using electronic, optical or any other technology.
- **Protocol for response to Epidemiological Risks.** Program whose objective is to ensure that the organization complies with a protocol establishing the necessary measures to mitigate and/or reduce the risks of contagion of contagious diseases.
